State tests serve as a snapshot that helps schools and districts evaluate their instructional programs by providing information about student readiness in math, English language arts, and science. Because of this, other information (e.g., opportunity to learn, mode of learning, access to grade-level content, attendance, course grades) should be considered when reviewing your data.

Your student's testing history helps you know how your student is progressing from one year to the next. To learn more about a particular test, please click on the test.
