Student Requirements for Spanish Voice Pack installation:

Student(s) who require a Spanish verbal translated online test form as documented in their ELAP **must** have been using this accommodation throughout the year. The DTC/BTC will need to assign the student a Spanish test with the read-aloud accommodation.

Technical Requirements for Spanish Voice Pack installation:

Cepstral Spanish Alejandra Language Pack must be downloaded and installed onto the testing device used by the student(s) for the Spanish text-to-speech to work properly.

Note: The Cepstral Spanish Voice Pack does not need to be installed on Chromebooks. Students that use an iPad/tablet must be tested using a Chromebook or a computer with the Cepstral Spanish Voice Pack installed.

Important: Licenses are offered for Windows and MAC workstations. The licensing of this language pack is **limited**. To avoid the need for multiple installations of this language pack, **please stagger student testing** through the same machine(s) to use as few computers as possible.

Total number of computers you plan to install the Cepstral Spanish voice pack onto.

Please email this form to: oktechsupport@cognia.org

You will then receive an email with Spanish voice pack installation directions.
